Microelectronics Support Centre FTP Download Server

In the case of most EUROPRACTICE vendors, users may download the installation media for the latest tools releases from an FTP server here at the Microelectronics Support Centre. License files will continue to be delivered via e-mail.

To download, you must connect to the server ftp://download.msc.rl.ac.uk/

Access is controlled by a username and password. These login credentials are only sent to the EUROPRACTICE Representative at each EUROPRACTICE member institution and we ask the Representative to keep these details private. However, EUROPRACTICE Representatives have been sent information on how they can to nominate a limited number of appropriate colleagues within the EUROPRACTICE member to receive their own private login details for FTP Server access (plus access to license files and certain other password controlled data).

EUROPRACTICE Representatives should login to our Member Only Page http://www.europractice.stfc.ac.uk/about/login.cfml and login to our Member Only Web pages.

If you are unable to contact your EUROPRACTICE Representative or are unsure who this is then please e-mail us via MicroelectronicsCentre@stfc.ac.uk

Please note that all FTP Server passwords will be refreshed annually.

The EUROPRACTICE Representative will be informed each time a new bundle becomes available via an order, and each time an annual tools upgrade becomes available for established bundles.
